

Automation Testing Program on Locators Practice

1. Fill Form & Submit

```
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.chrome.ChromeDriver;

import java.time.Duration;
import java.util.List;

public class FormFieldsAutomation {
    public static void main(String[] args) {

        WebDriver driver = new ChromeDriver();
        driver.manage().window().maximize();
        driver.manage().timeouts().implicitlyWait(Duration.ofSeconds(10));

        driver.get("https://practice-automation.com/form-fields/");

        // ===== TEXT FIELDS =====
        driver.findElement(By.id("name")).sendKeys("John Doe");
        driver.findElement(By.id("password")).sendKeys("Test123");

        // ===== CHECKBOXES =====
        driver.findElement(By.id("drink1")).click(); // Water
        driver.findElement(By.id("drink3")).click(); // Coffee

        // ===== RADIO BUTTON =====
        driver.findElement(By.id("color2")).click(); // Blue

        // ===== DROPDOWN =====
        WebElement dropdown = driver.findElement(By.id("automation"));
        dropdown.click();
        driver.findElement(By.xpath("//option[text()='Yes']")).click();

        // ===== AUTOMATION TOOLS CHECKBOXES =====
        driver.findElement(By.id("selenium")).click();
        driver.findElement(By.id("playwright")).click();

        // ===== EMAIL =====
        driver.findElement(By.id("email")).sendKeys("john@test.com");

        // ===== MESSAGE =====
```

```
        driver.findElement(By.id("message")).sendKeys("This is a test message");

        // ===== SUBMIT =====
        driver.findElement(By.id("submit")).click();

        System.out.println("Form submitted successfully!");

        driver.quit();
    }
}
```

2. Use of Select

```
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.chrome.ChromeDriver;
import org.openqa.selenium.support.ui.Select;

import java.util.List;

public class LocatorsPractice {

    public static void main(String[] args) throws InterruptedException {

        WebDriver driver = new ChromeDriver();

        driver.get("https://practice.expandtesting.com/locators");
        driver.manage().window().maximize();
        Thread.sleep(2000);

        // 1) Locate by Button text (XPath)
        WebElement addItemButton =
driver.findElement(By.xpath("//button[text()='Add Item']"));
        System.out.println("Button Text: " + addItemButton.getText());

        Thread.sleep(1000);

        // 2) Locate text by CSS or XPath
        WebElement hotDealText =
driver.findElement(By.xpath("//*[contains(text(),'Buy 1 Get 1 Free')]"));
        System.out.println("Hot Deal Text: " + hotDealText.getText());
    }
}
```

```
Thread.sleep(1000);

// 3) Locate dropdown and select a country
WebElement countrySelect = driver.findElement(By.tagName("select"));
Select = new Select(countrySelect);
select.selectByVisibleText("Canada");
System.out.println("Selected Country: Canada");

Thread.sleep(1000);

// 4) Locate textbox and send keys
WebElement newsletterInput =
driver.findElement(By.cssSelector("input[placeholder='Email for
newsletter']"));
newsletterInput.sendKeys("test@example.com");
System.out.println("Input Entered: " +
newsletterInput.getAttribute("value"));

Thread.sleep(1000);

// 5) Locate image by alt attribute
WebElement avatarImage =
driver.findElement(By.cssSelector("img[alt='User avatar']"));
System.out.println("Avatar is displayed? " +
avatarImage.isDisplayed());

Thread.sleep(1000);

// 6) Locate reload button by title attribute
WebElement reloadBtn =
driver.findElement(By.cssSelector("button[title='Reload']"));
reloadBtn.click();
System.out.println("Clicked Reload Button");
Thread.sleep(2000);

// ===== getByPlaceholder =====
WebElement searchBox =
driver.findElement(By.cssSelector("input[placeholder='Search the site']"));
searchBox.sendKeys("Selenium");
System.out.println("Search entered");

WebElement filterBox =
driver.findElement(By.cssSelector("input[placeholder='Filter by tag']"));
```

```
filterBox.sendKeys("Automation");
System.out.println("Filter entered");

// ===== getByText (Buttons) =====
driver.findElement(By.xpath("//button[text()='Reload']")).click();
System.out.println("Reload clicked");

driver.findElement(By.xpath("//button[text()='Settings']")).click();
System.out.println("Settings clicked");

Thread.sleep(1000);

// ===== getByTestId (Badge Text) =====
WebElement badge =
driver.findElement(By.xpath("//*[contains(text(),'Software Testing')]"));
System.out.println("Badge text: " + badge.getText());

// ===== Task List =====
List<WebElement> tasks =
driver.findElements(By.cssSelector("ul li"));

System.out.println("Tasks:");
for (WebElement task : tasks) {
System.out.println(task.getText());
}

// ===== Table Data =====
List<WebElement> rows =
driver.findElements(By.xpath("//table/tbody/tr"));

System.out.println("\nProduct Table:");

for (WebElement row : rows) {
List<WebElement> cols = row.findElements(By.tagName("td"));
String product = cols.get(0).getText();
String status = cols.get(1).getText();
String stock = cols.get(2).getText();

System.out.println(product + " | " + status + " | " + stock);
}

    driver.quit();
}
```

3. Form Validation Message testing

```
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.chrome.ChromeDriver;

public class TestProgram {
    public static void main(String[] args) {
        // open chrome browser
        WebDriver driver = new ChromeDriver();
        // open url
        driver.get("https://javabykiran.com/liveproject/index.html");

        // enter username in username field
        WebElement username =
driver.findElement(By.xpath("//input[contains(@id='em')]"));
        username.sendKeys("kiran@gmail.com");

        // enter password in password field
        WebElement password =
driver.findElement(By.cssSelector("#password"));
        password.sendKeys("123456");

        // click on login button
        WebElement submit = driver.findElement(By.cssSelector("button.btn-
flat"));
        submit.click();

        /*
        * String data = driver.getPageSource(); if
(data.contains("Dashboard")) {
        *
        * System.out.println("Testcase execution is Pass"); } else {
        * System.out.println("Error - Testcase execution is failed"); }
        */

        String actualTitle = driver.getTitle();
        // System.out.println(actualTitle);

        String expectedTitle = "JavaByKiran | Dashboard";

        // Testing (to check actual result and expected result)
```

```
        if (actualTitle.equals(expectedTitle)) {
            System.out.println("test case pass");
        } else {
            System.out.println("test case failed == title is mismatch");
        }

        String actualURL = driver.getCurrentUrl();
        String expectedURL =
"https://javabykiran.com/liveproject/pages/examples/dashboard.html";

        if (actualURL.equals(expectedURL)) {
            System.out.println("url is work as expected");
        } else {
            System.out.println("url is mismatch");
        }
    }
}
```

OR

```
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.chrome.ChromeDriver;
import org.openqa.selenium.support.ui.Select;

public class FormValidationAutomation {

    public static void main(String[] args) throws InterruptedException {

        WebDriver driver = new ChromeDriver();

        driver.get("https://practice.expandtesting.com/form-validation");
        driver.manage().window().maximize();

        Thread.sleep(2000);

        // ===== Contact Name =====
        WebElement nameInput = driver.findElement(By.id("contactName"));
        nameInput.sendKeys("John Doe");

        // ===== Contact Number =====
```

```
WebElement phoneInput = driver.findElement(By.id("contactNumber"));
phoneInput.sendKeys("9876543210");

// ===== Pickup Date =====
WebElement dateInput = driver.findElement(By.id("pickupDate"));
dateInput.sendKeys("12-12-2026");

// ===== Payment Method =====
WebElement paymentDropdown =
driver.findElement(By.id("paymentMethod"));
Select = new Select(paymentDropdown);
select.selectByVisibleText("Credit Card");

// ===== Submit Form =====
driver.findElement(By.xpath("//button[text()='Register']")).click();

Thread.sleep(2000);

// ===== Validation Result =====
String pageText = driver.getPageSource();

if (pageText.contains("success") || pageText.contains("registered")) {
System.out.println("✅ Form submitted successfully");
} else {
System.out.println("⚠ Check validation messages on page");
}

driver.quit();
}
}
```

OR

```
import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.chrome.ChromeDriver;

public class FormValidationCheck {

public static void main(String[] args) throws InterruptedException {

WebDriver driver = new ChromeDriver();
```

```
driver.get("https://practice.expandtesting.com/form-validation");
driver.manage().window().maximize();

Thread.sleep(2000);

// Submit form without valid data
driver.findElement(By.xpath("//button[text()='Register']")).click();

Thread.sleep(2000);

// ===== Capture Validation Messages =====
String nameError =
driver.findElement(By.id("contactName-error")).getText();
